## SELECTED CODING PROJECTS

---

### TEEN BEACH BEATS

Social Sound Mixing Board.

<http://teenbeach2.deluxeluxury.com>

#### Responsibilities:

UX design.

Full front and back-end development.

Responsive web development.

Mixing board development.

#### Challenges:

Using 3rd party howler framework to create mobile and IE9 compatible mixing experience.

Delivering a seamlessly looping background track.

Crab animation sychronization with tempo.

Social media sharing with dynamically generated urls.

### CNNE VIDEO ON DEMAND SWEEPSTAKES

Sweepstakes entry site in NodeJS.

<http://cnnevod.deluxeluxury.com>

#### Responsibilities:

Full front and back-end.

Responsive integration.

Amazon Web Services setup:

Route53, EC2, Elastic Beanstalk, Dynamo DB, S3.

NGINX, NodeJS, PHPFPM setup and testing on staging servers.

Auto-deployment for staging versions from Bitbucket repositories.

#### Challenges:

HTML file parsing and tag replacement for tracking.

Safari caching issues.

Forever installation and run-levels configuration.

### PLAY THE BOARDWALK:

Mobile and desktop (IE9 minimum) compatible

sweepstakes entry with gaming component.

<https://hothousesecure.com/playtheboardwalk/>

#### Responsibilities:

Game development.

Front-end development.

Technical and design requirements

Game development research - (looked into a few engines and decided I had to do custom work)

#### Challenges:

Hit detection.

Rotation calculation.

Sprite loading.

Javascript object memory management.

Mouse coordinates calculations for minimized and maximized window; each browser has slightly different calculations.

Mobile device testing and debug.
